The Region's Most Powerful Full-Time Radio Station 5,000 Watts
1560 Khz 605/229-1560 Box 317, Aberdeen, South Dakota 57401

June 25, 1974

Mr. Ernest J. Wesolowski
1416 Pasadena Avenue
Omaha, Nebraska 68107

Dear Mr. Wesolowski:

We very much appreciate your letter in regard to our testing, including the signal strength reports. I am enclosing coverage maps of our day and night patterns.

We will be a full-time 5 kilowatt station, with six towers and two patterns. We are presently operating at 1 kw during the tuning of our phasor.

We would very much appreciate any other report you might be able to give us in the future. Tape recordings will not be necessary at present, but we will inform you at a later date when we can use them.

During your reception we were on our day pattern, which explains why you received it in Omaha.

Thank you again for your letter, and we look forward to hearing from you again.

Very truly yours,

Meryl Valnes

Meryl Valnes
Assistant Chief Engineer

P.S. If you are ever in this area, you are more than welcome to stop out at the station for a personal visit.
